Positively Speaking CME Program is a web-based, 1-hour continuing medical education (CME) program designed to assist clinicians caring for people living with HIV to integrate brief prevention messages into their clinical practice. This CME program features natural provider-patient interactions to help clinicians promote safer sexual behaviors and drug use behaviors among HIV-infected patients. Positively Speaking also demonstrates how to identify teachable moments and how clinicians can use them to positively impact behavior change.

**Faculty**

- **John T. Brooks, M.D.**
  Senior Medical Advisor, Division of HIV/AIDS Prevention, Centers for Disease Control and Prevention
  Staff Physician
  Atlanta VA Medical Center, Infectious Disease Unit

- **Wayne Duffus, MD, PhD**
  Associate Director for Health Equity,
  CDC’s National Center for HIV, Viral Hepatitis, STD and TB Prevention, Atlanta, GA
  Clinical Associate Professor of Infectious Diseases,
  University of South Carolina School of Medicine, Columbia, SC

- **W. David Hardy, M.D.**
  Senior Director of Evidence-Based Practices, Whitman-Walker Health
  Adjunct Professor of Medicine, Division of Infectious Diseases, Johns Hopkins University School of Medicine

- **Jack Mackenroth**
  Patient Advocate,
  HIV Activist and Educator

- **Kathleen E. Squires, MD**
  The W. Paul and Ida H. Havens Professor of Infectious Diseases,
  Director, Division of Infectious Diseases,
  Thomas Jefferson University, Philadelphia, PA

**Additional Opportunities**

Patient Adherence: A Critical Component of HIV Suppression is a live presentation and online Q&A with clinicians regarding the latest in managing patient adherence to antiretroviral therapy.

Antiretroviral Therapy: Caring for HIV-Infected Patients and Preventing HIV Transmission

In recent years, new data have emerged about the efficacy of antiretroviral therapy to decrease the likelihood of HIV transmission for effectively treated HIV-infected persons and to decrease the risk of acquiring HIV infection for HIV-uninfected at-risk individuals. This case-based activity (http://www.idcarelive.com/content/antiretroviral-therapy-caring-hiv-infected-patients-and-preventing-hiv-transmission) from IAS-USA discusses the effects of antiretroviral medications on HIV transmission and acquisition and best practices that clinicians can use when caring for patients to decrease the spread of HIV. Visit the IAS-USA website (https://www.iasusa.org/content/antiretroviral-therapy-caring-hiv-infected-patients-and-preventing-hiv-transmission) to start learning from this new activity and earn CME credit. This activity was funded by the Centers for Disease Control and Prevention (CDC) of the U.S. Department of Health and Human Services (HHS).

CDC Learning Connection (https://www.cdc.gov/learning/)

The CDC Learning Connection provides information about public health training developed by the CDC, CDC partners, and other federal agencies. The CDC Learning Connection (https://www.cdc.gov/learning/) keeps users informed about training opportunities, including many that offer free continuing education (CE).

Access the CDC Learning Connection (https://www.cdc.gov/learning/).
